weather information

Temp Average daily max temperature in °F and °C
 Sun Average daily hours of sunshine
 Rain Average monthly rainfall in inches

weather

The information in this table is only a guide and has been compiled from information provided by the Meteorological Office and tourist boards. Weather patterns around the world are changing and becoming more and more unpredictable. Some of the destinations in this brochure can suffer from extreme weather conditions such as hurricanes, typhoons and floods. Whilst we hope that you have fine weather during your holiday, Virgin Holidays cannot take any responsibility for the statistical information provided in this chart or be liable for any changes to your holiday plans due to weather conditions.

inoculations & medical precautions

We recommend that you check with your doctor who can give you the latest advice. However, for all of our destinations it is a good idea to be up to date with your injections for polio, tetanus and hepatitis. Malaria is also a risk in certain destinations. Preventative tablets for malaria can be obtained without prescription from the chemist, but always check with your doctor for their advice.
